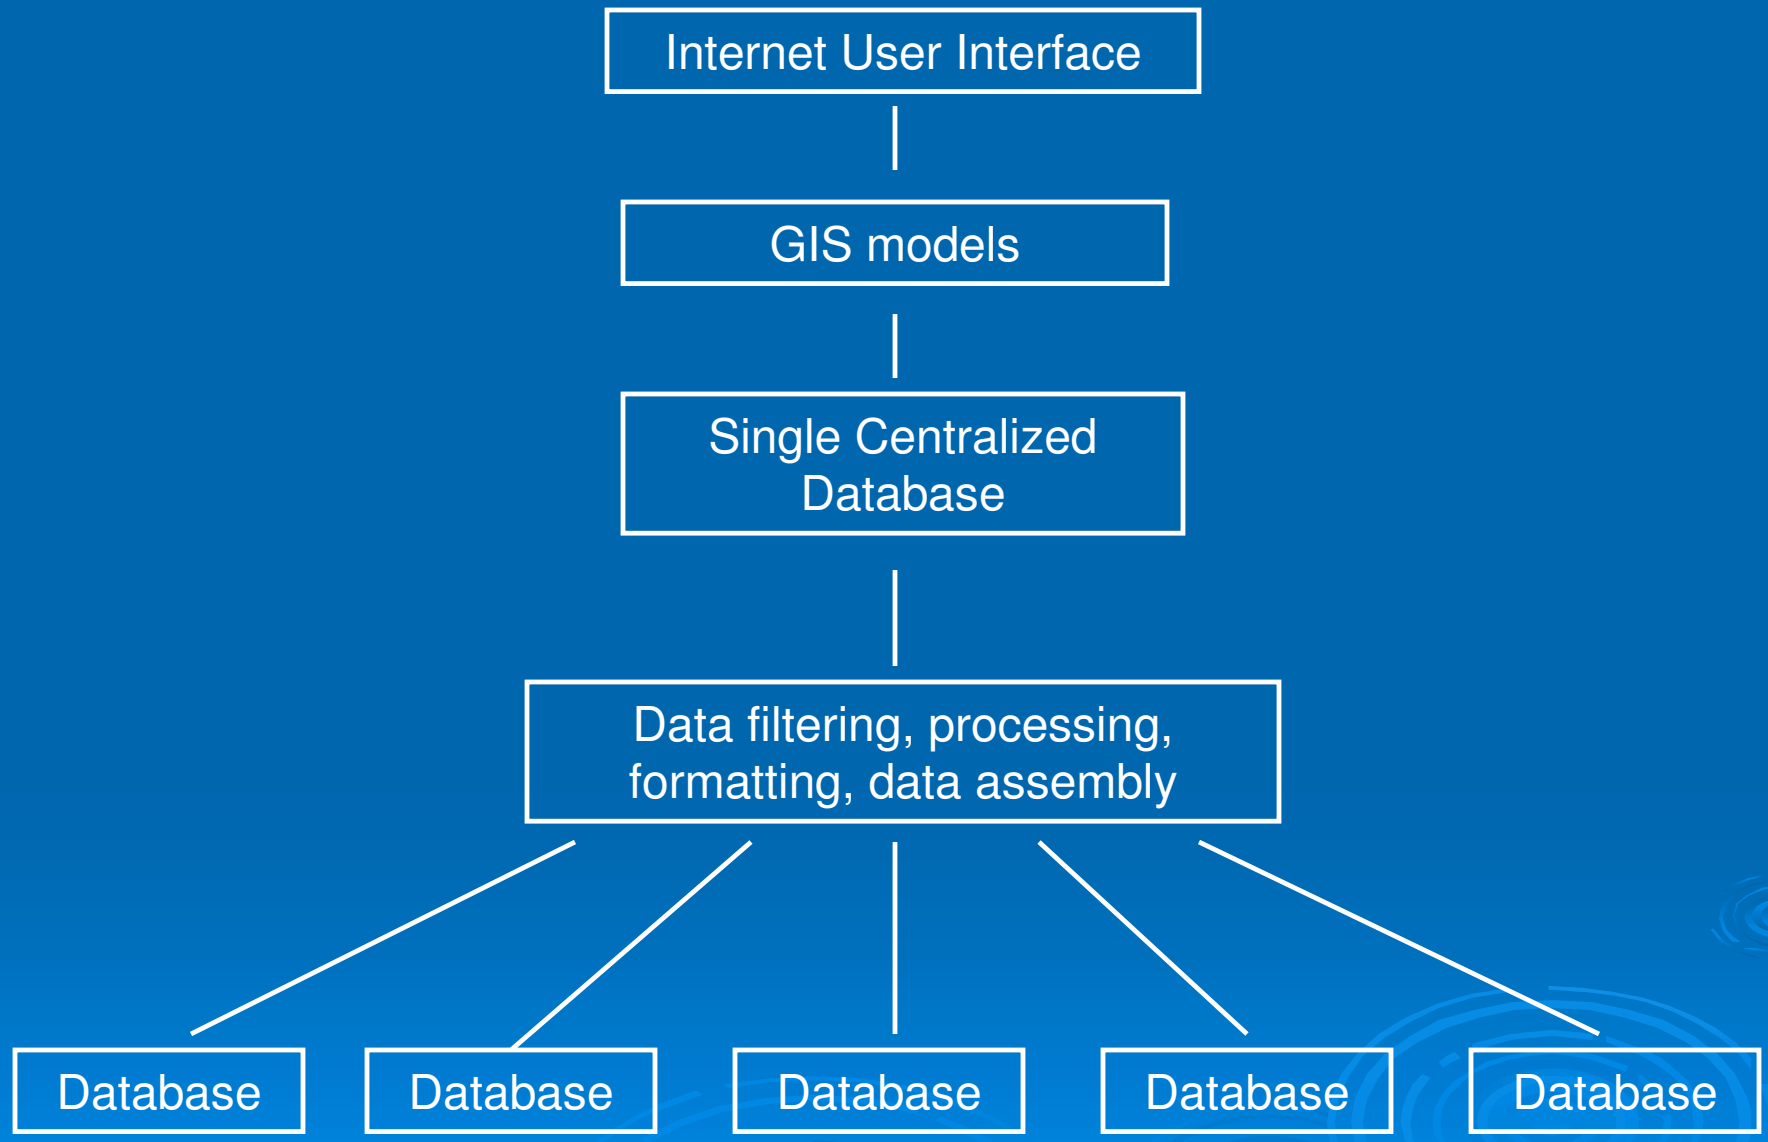
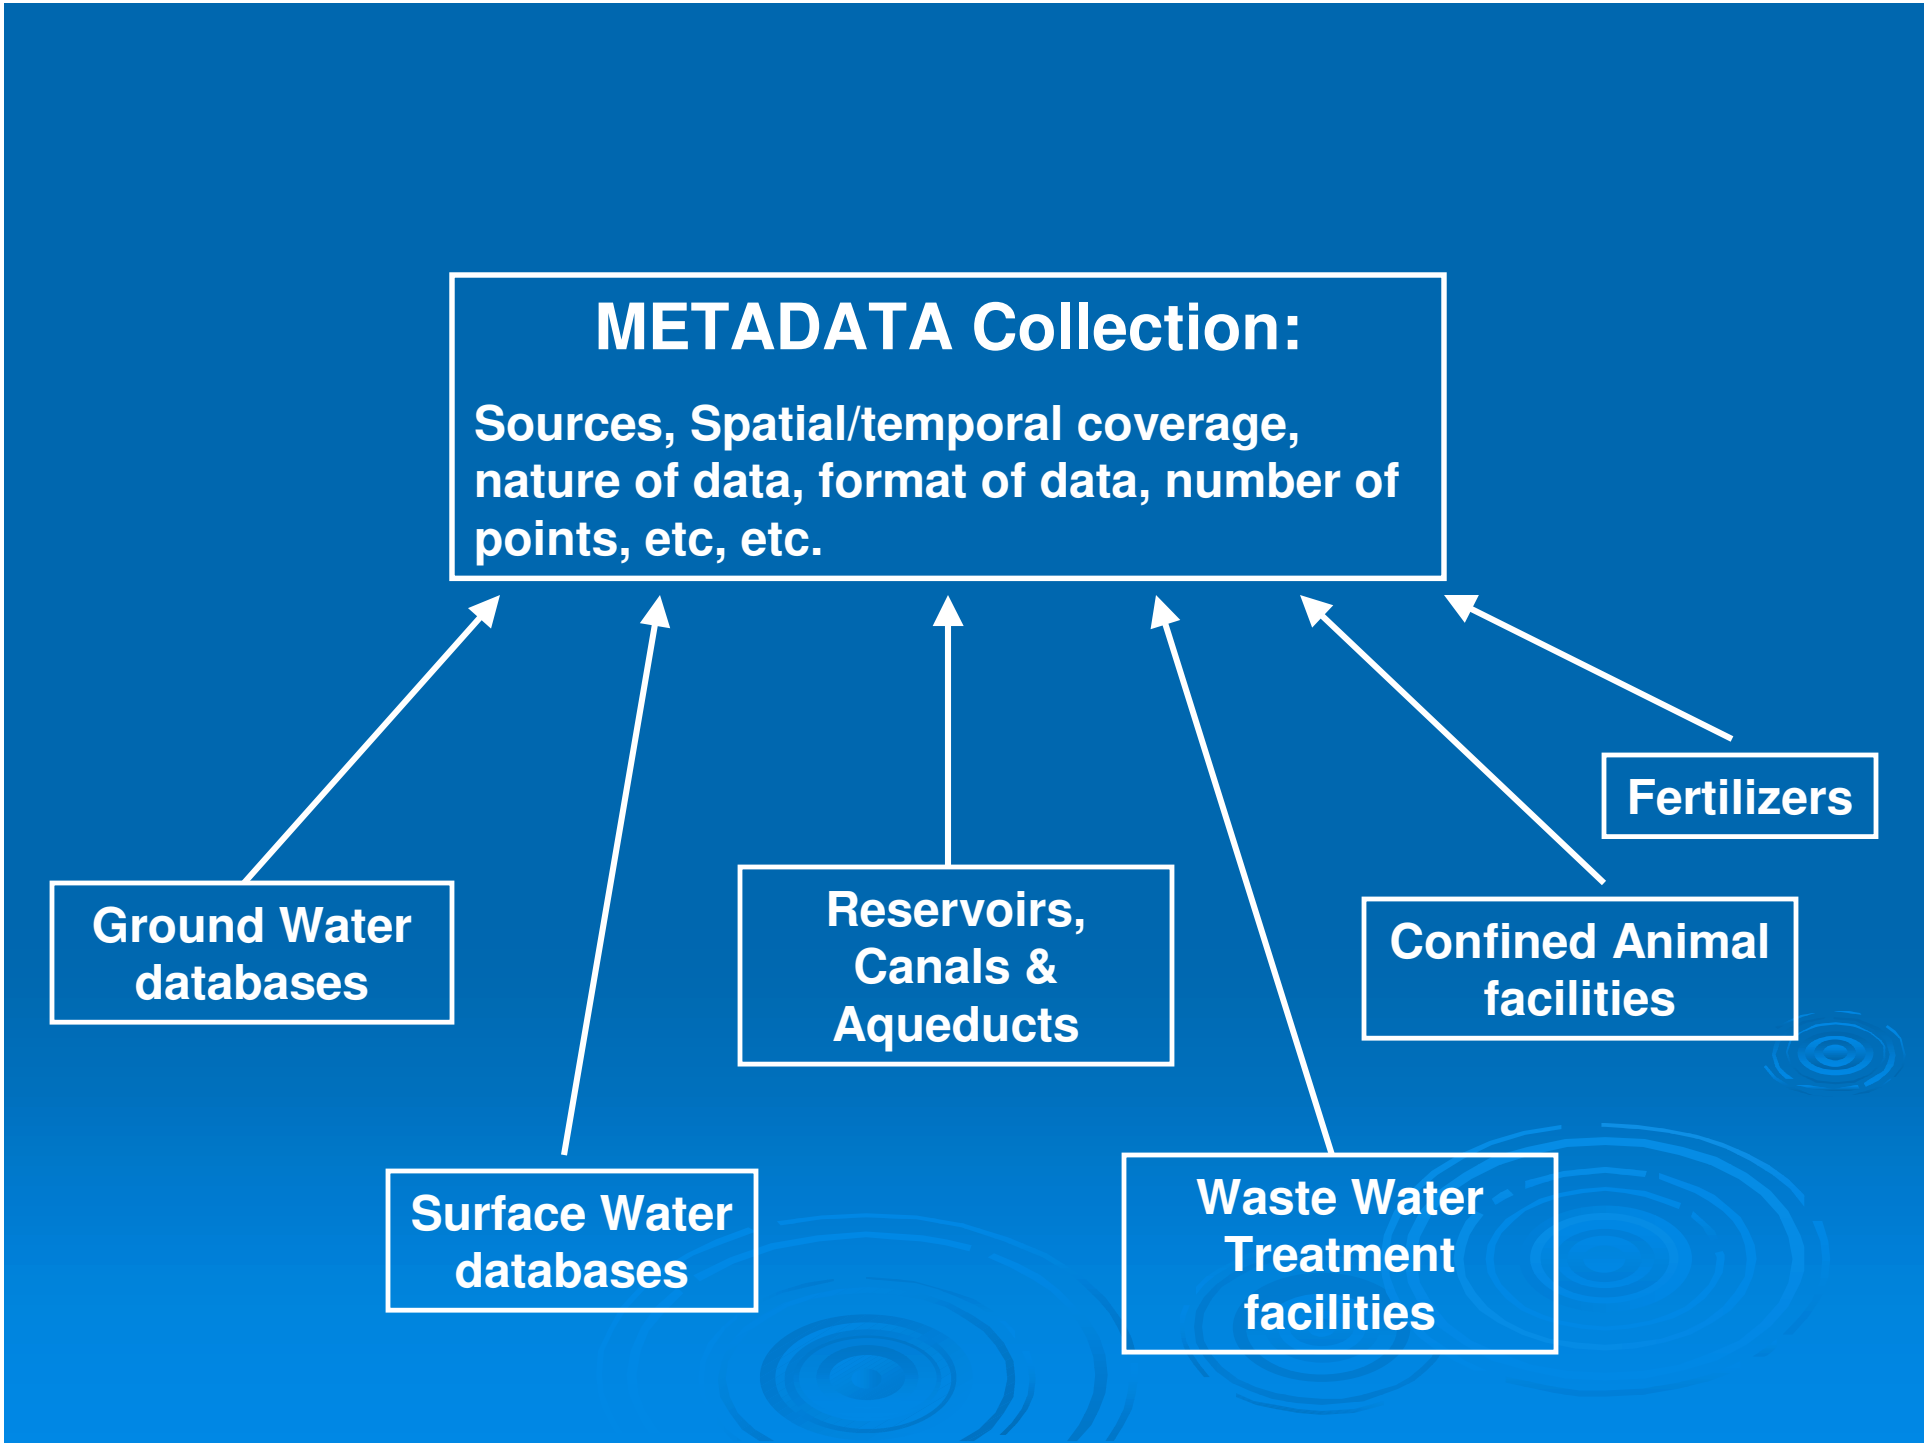
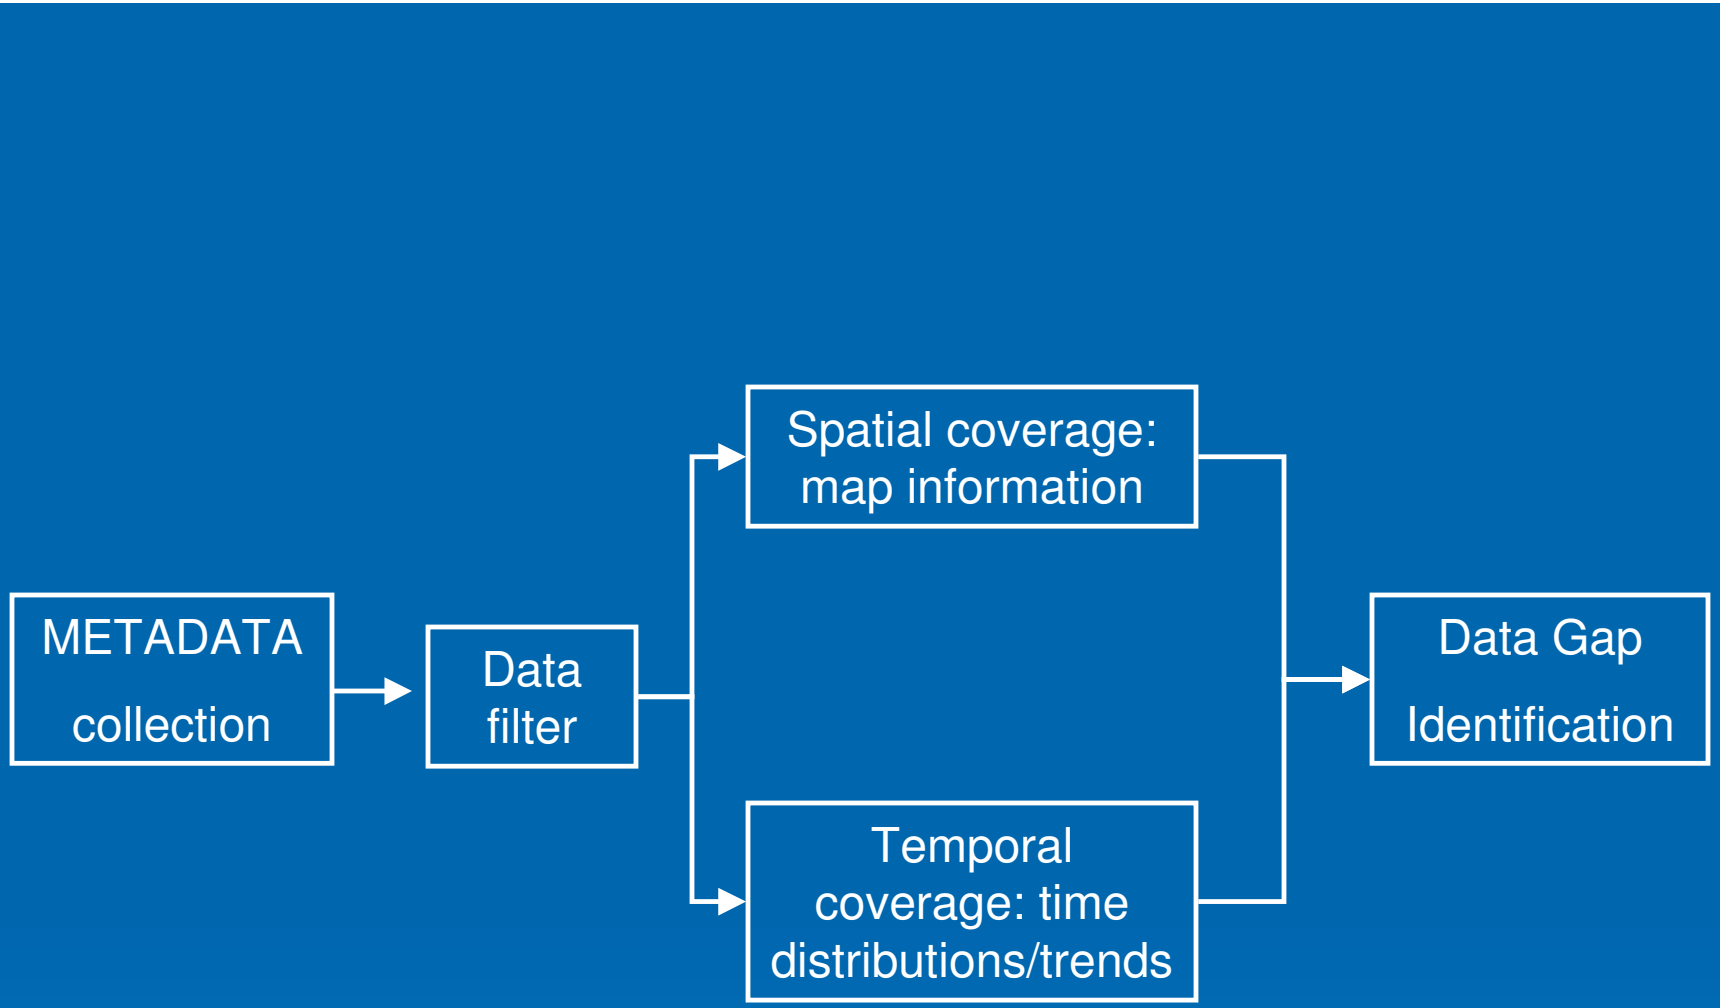
Original Plan



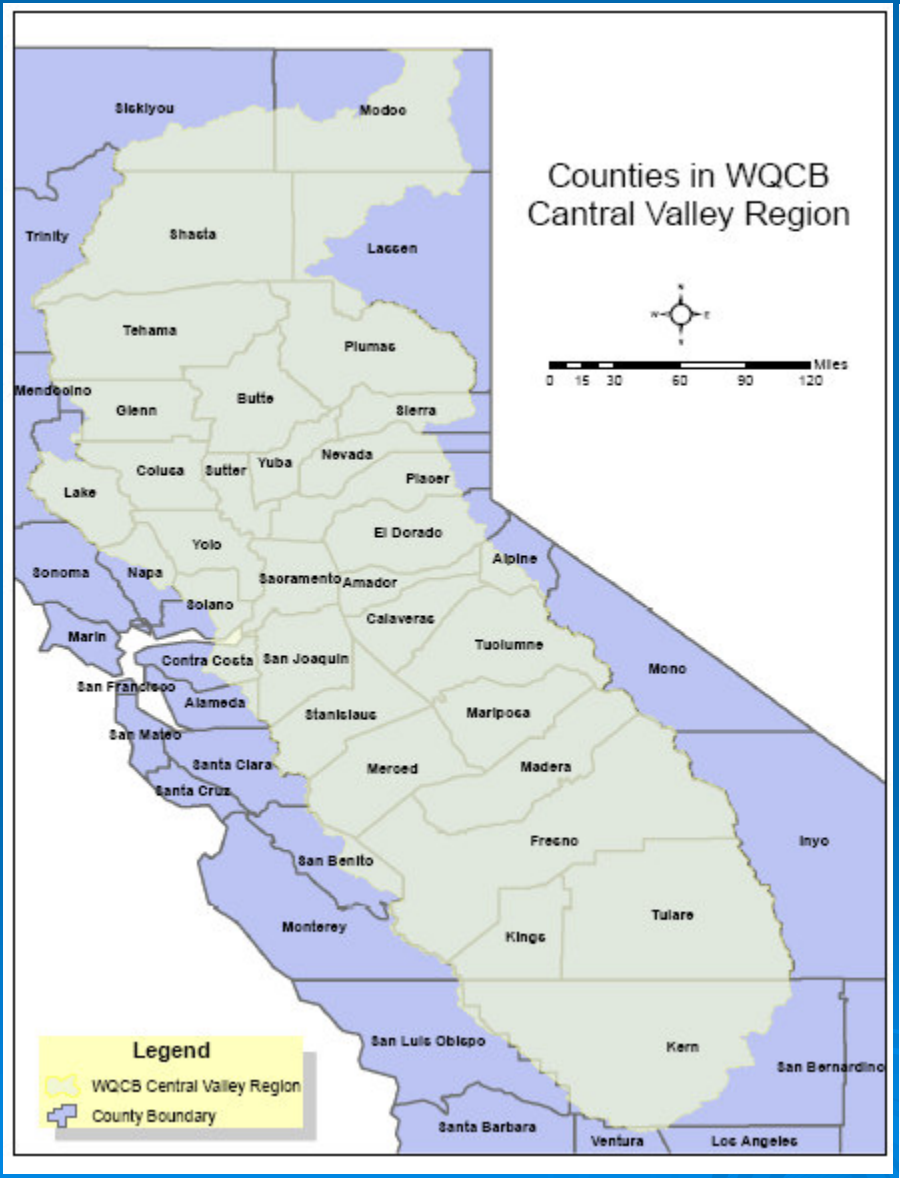


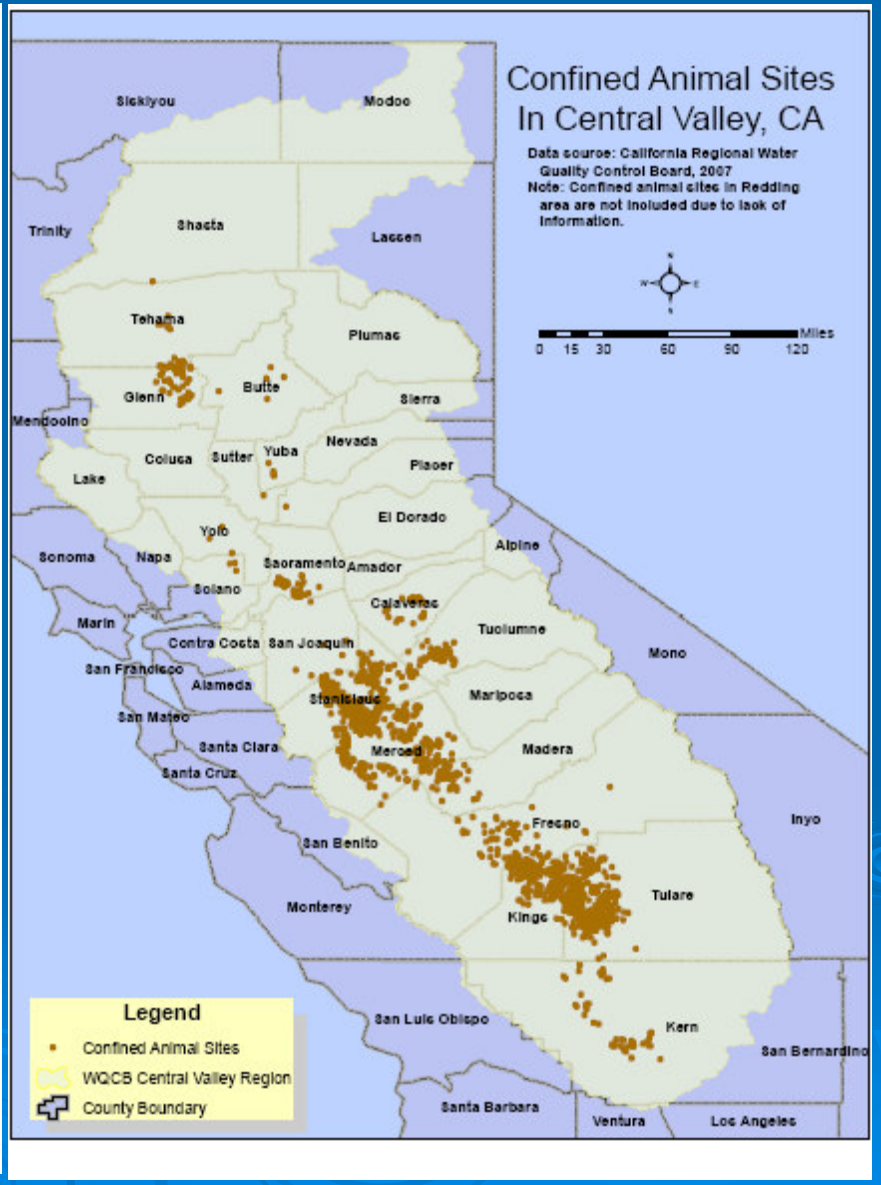
METADATA Collection:
Sources, Spatial/temporal coverage, nature of data, format of data, number of points, etc, etc.
Ground Water databases
Surface Water databases
Reservoirs, Canals & Aqueducts
Waste Water Treatment facilities
Confined Animal facilities
Fertilizers

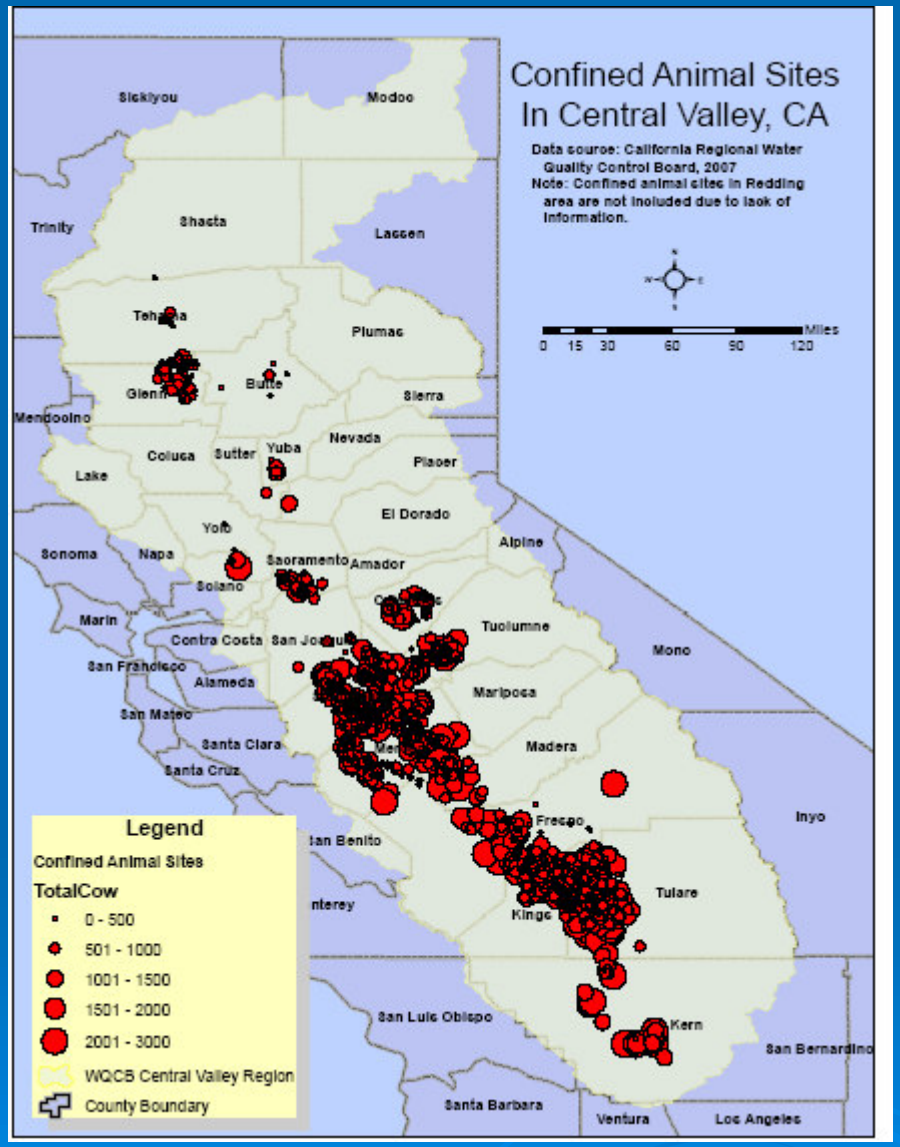


METADATA collection
Data filter
Spatial coverage: map information
Temporal coverage: time distributions/trends
Data Gap Identification

An Example of Metadata Processing



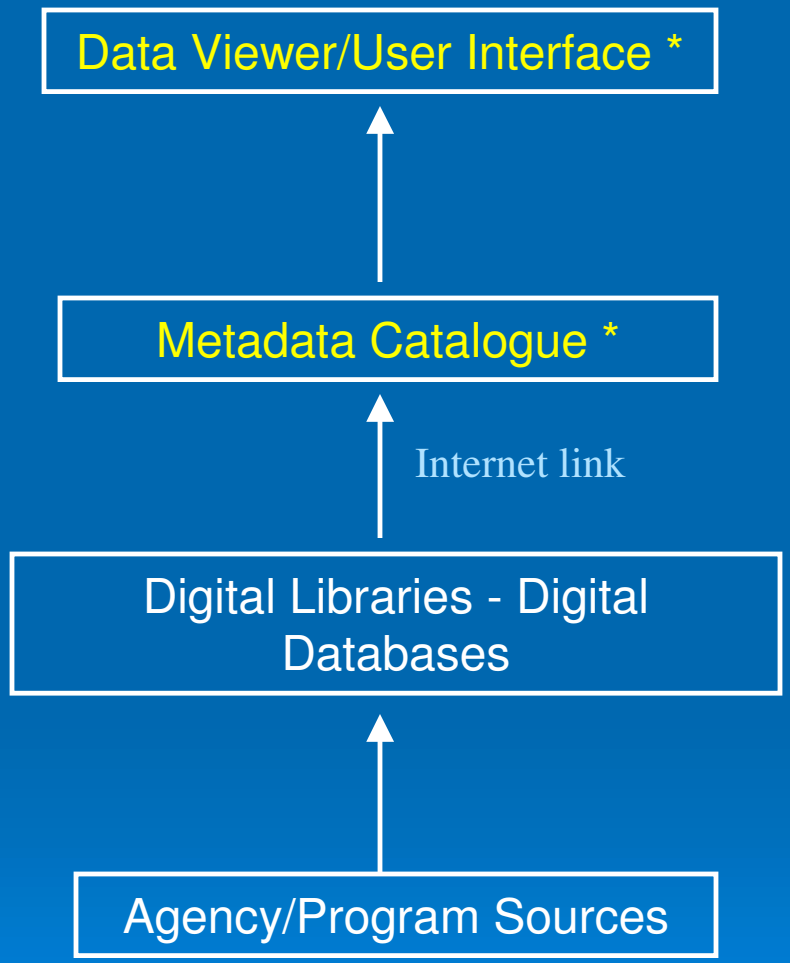




Number of animals x average nitrate per animal per year = total nitrate production

Example: Estimate % of groundwater loading per acre

DATA APPLICATION & MAINTENANCE (Suggested)



* CVRWQCB
